

Compliance with REACH

REACH (**R**egistration, **E**valuation, **A**uthorization, and **R**estriction of **C**hemical substances) is a European Community Regulation on chemicals and safe use (E.C. 1907/2006). The regulation entered into force on June 1, 2007.

Axzon supports the primary aim of REACH in improving the protection of human health and the environment through the better and early identification of the intrinsic properties of chemical substances. Axzon meets all applicable REACH requirements and is committed to providing our customers with information about substances in its products as required.

Under REACH, the registration provision applies to the manufacture or import of chemicals and does not apply to Axzon's operations. It is anticipated that raw material manufacturers will register substances used in electronic products within the supply chain.

Axzon's products are "articles" as defined in REACH Article 3(3) and do not release substances under their regular use. Suppliers of articles must provide recipients with information on the Substances of Very High Concern (SVHC) candidate list valid from February 4th, 2026 if those are present above a concentration limit of 0.1 % on an article level.

Additionally, product and product packaging, based on Axzon's knowledge, complies to REACH Annex XIV and REACH Annex XVII as of the date of issuance of this certificate.

Axzon's products do not contain the Substances of Very High Concern, included in the Candidate List of substances of very high concern, issued by the European Chemical Agency (ECHA), last updated on 4th February 2026, with exception of Lead, which may be contained in some products.
